Elliott, Jayne; Stuart, Meryn and Toman, Cynthia: Place and Practice in Canadian History (2009)

**Abstract:** The close association between nurses and hospitals obscures the diversity and complexity of nursing work in other contexts. This collection looks at nurses and nursing in a wide range of settings from the mid-1800s to the 1970s, including indigenous women on the Canadian prairies; First World War nurses posted overseas; outpost nurses in rural and remote areas of Saskatchewan, Ontario, and Quebec; public health nurses in Winnipeg; and religious congregations in nursing education in New Brunswick.

McPherson, Kathryn; Stuart, Meryn, Writing Nursing History in Canada: Issues and Approaches. <https://doi.org/10.3138/cbmh.11.1.3>. Abstract: Published Online: December 13, 2016 Should the history of nursing be presented as part of medical history? Twenty years ago the answer would have been “yes.” Nurses writing about their collective past shared with physician-historians an interest in questions of professionalization, elite institutions (especially hospitals), higher education, dynamic and respected leaders, and interpretive frameworks that often affirmed the profession’s achievements. For these reasons, nursing was often treated as a subset of medicine, an important, although often less important in its own right, adjunct to the reform of the hospital and the rise of scientific medicine

The role of unregulated care providers in home care: A scoping review. Abstract: Health care needs of individuals living in the community are increasing. To meet the rising need, unregulated care providers are providing more complex patient care. The aim of this review is to articulate the unregulated care provider role by identifying patient care activities offered by unregulated care providers in home care.
